Index of Authors

Numerals followed by the letter A refer to Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

Aaron, J. I., Gatenby, S. J., Jack, V. & Mela, D. J. Effect of reduced-fat and reduced-sugar food use on diet and weight status of free-living consumers 215A

Abel, Gillian, Hampshaw, Susan, Stringer, Mark D., Beck, John M. & Puntis, John W. L. Home gastrostomy feeding in children and the role of a nutrition nurse 193A

Abraha, Arefaine, Humphreys, Sandy M. & Frayn, Keith N. Acute augmentation of postprandial lipaemia by fructose 171A

Abramovich, D. see *Haggarty, P.* 114A

Achour, L. see *Briet, F.* 8A

Achour, L., Flourié, B., Briet, F., Franchisseur, C., Bornet, F., Rambaud, J. C. & Messing, B. Comparisons of metabolic responses to digestible and partly indigestible starches in healthy humans 7A

Adams, K. S., Flint, D. J., Cryer, A. & Vernon, R. G. Regulation of ovine preadipocyte differentiation *in vitro* 25A

Afolabi, B. M. see *Ejidokun, O. O.* 142A

Ah-Sing, E. see *Yeboah, N.* 37A

Ailhaud, Gérard, Amri, Ez-Zoubir & Grimaldi, Paul-André Fatty acids and expression of lipid-related genes in adipose cells 151–154

Ait-Yahia, D. see *Senouci, S.* 64A

Akinsete, I. see *Ejidokun, O. O.* 142A

Alberti, K. G. G. M. see *Daly, M.* 169A

Albrecht, R. see *Darmon, N.* 51A

Allazard, Catherine see *Breuillé, Denis* 40A

Allison, Simon P. see *Gazis, Anastasios* 146A

Allison, Simon P. The management of malnutrition in hospital 855–862

Allwood, M. C. see *Hinchliffe, L.* 198A

Al-Shagrawi, R. A. see *Iqbal, S. S.* 159A

Ambrose, J. see *Ballevre, O. P.* 129A

Amri, Ez-Zoubir see *Ailhaud, Gérard* 151–154

Anderson, A. S. & Lean, M. E. J. Changing dietary intake: a plate model approach 76A

Anderson, Neil G. see *Yarwood, Stephen J.* 24A

Anderton, A. see *McKillop-Smith, A.* 201A

Anklesaria, P. S. see *Marlow, M. C.* 141A

Aoubala, Mustapha see *Verger, Robert* 5–18

Arbuckle, Margaret I. see *Livingstone, Callum* 179–190

Ardouin, B. see *Quignard-Boulange, A.* 73A

Armand, M., Hamosh, M., Dipalma, J. S., Gallagher, J., Benjamin, S. B., Philpott, J. R., Hamosh, P. & Lairon, D. Gastric lipase activity is modulated by dietary fat intake in human subjects 72A

Arnal, Maurice see *Breuillé, Denis* 40A

Arthur, John R. see *Bermano, Giovanna* 31A

Arthur, John R. see *Ross, Marion A.* 93A

Arthur, J. R. see *Mitchell, J. H.* 32A

Arvaniti, K. see *Savoie, L.* 56A

Aryee, P. A., Williams, E. A., Rumsey, R. D. E. & Powers, H. J. The effects of riboflavin depletion and repletion on the structure and cytokinetics of the small intestine 96A

Ashton, J. see *Haggarty, P.* 114A

Ashton, J. see *Haggarty, P.* 126A

Ashwell, M. A. see *Lejeune, S. R. E.* 230A

Ashwell, M. A., Lejeune, S. R. E. & McPherson, K. Use of the waist:height ratio to assess the risks of obesity 83A

Ashworth, F., McAlweenie, A., Williams, S., Hodson, M., Poole, S. & Westaby, D. Overnight percutaneous endoscopic gastrostomy (PEG) feeding using an elemental formula in adolescents and adults with cystic fibrosis 200A

Astrup, Arne, Buemann, Benjamin, Toubro, Søren & Raben, Anne Defects in substrate oxidation involved in the predisposition to obesity 817–828

Astrup, Arne & Raben, Anne Glucostatic control of intake and obesity 485–495

Atkinson, M. see *Nelson, M.* 205A

Attia, Nebil, Sakr, Sana, Paul, Jean-Louis, Soni, Theophile & Girard-Globa, Anik Size and clearance of chylomicrons after different fat loads in young women 110A

Austin, S. see *Weaver, L. T.* 174A

Bach, A. C. see *Groscolas, R.* 107A

Bach, A. C. see *Groscolas, R.* 108A

Backwell, F. R. C. see *Metcalf, J. A.* 100A

Backwell, F. R. Colette see *Hipólito-Reis, Maria* 36A

Badalloo, A. see *Yeboah, N.* 37A

Bakker, J. G. M. see *Van Der Meulen, J.* 60A

Bal, W. see *Roper, C. S.* 54A

Bal, Wendy see *Roper, Clive S.* 238A

Balage, Michele see *Hocquette, Jean-François* 221–236

Index of Subjects

Numerals followed by the letter A refer to Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

Acipimox
The effect of Acipimox administration on the contribution of different pathways to postprandial glycogen synthesis in cachectic tumour-bearing rats **55,** 170A, 1996
Adipose tissue
A comparison of insulin-stimulated glucose uptake in isolated adipocytes from different fat deposits. Does glucagon-like peptide 1 enhance uptake? **55,** 228A, 1996
Adipocyte hormone-sensitive lipase: a major regulator of lipid metabolism **55,** 93, 1996
Administration of an anti-adipocyte monoclonal antibody to piglets: effects on adipose tissue development and lipid content **55,** 23A, 1996
Cyclic AMP modulates adipogenesis in 3T3-F442A cells **55,** 24A, 1996
Effects of *n*-3 polyunsaturated fatty acids on lipid storage-related enzymes in adipose tissue of sucrose-fed insulin resistant rats **55,** 73A, 1996
Elevated expression of the *ob* (obese) gene in white adipose tissue of diabetic (*db/db*) mice **55,** 28A, 1996
Fatty acids and expression of lipid-related genes in adipose cells **55,** 151, 1996
Influence of thyroid hormones and temperature on adipose tissue development and lung maturation **55,** 561, 1996
Involvement of brown adipose tissue in the limiting effect of *n*-3 polyunsaturated fatty acids on obesity induced by a high fat diet in the rat **55,** 109A, 1996
Limitation of the hypertrophy of adipose tissues by fish-oil *n*-3 fatty acids during high-fat feeding in the rat: eicosapentaenoic acid *v.* docosahexaenoic acid **55,** 107A, 1996
Microdialysis of adipose tissue to assess the effects of adrenaline infusion **55,** 163A, 1996
Number and affinity of subcutaneous insulin receptors during growth in Large White and Meishan pigs **55,** 66A, 1996
Nutritional regulation of the expression of the *ob* (obese) gene in white adipose tissue of mice **55,** 27A, 1996
Over-expression of GLUT4 selectively in adipose tissue in transgenic mice: implications for nutrient partitioning **55,** 191, 1996
Regulation of ovine preadipocyte differentiation *in vitro* **55,** 25A, 1996
Regulation of the antilipolytic effect of adenosine in sheep adipose tissue by growth hormone **55,** 26A, 1996
The influence of triidothyronine and/or noradrenaline on perirenal adipose tissue composition in lambs delivered near to term by Caesarean section **55,** 118A, 1996
The organisation of adipose tissue surrounding lymph nodes in guinea-pigs and methods of studying local interactions between adipose and lymphoid tissue **55,** 116A, 1996
Variations in GLUT4 protein content among bovine adipose tissues **55,** 21A, 1996
Adolescence
A study of bone growth in adolescent girls: the effect of an 18-month, milk-based dietary intervention **55,** 11A, 1996
Adolescent Kingston girls' school achievement: nutrition, health and social factors **55,** 333, 1996
Adolescent nutritional status in developing countries **55,** 321, 1996
Anaemia in adolescent girls: effects on cognitive function and activity **55,** 359, 1996
Basal metabolic rate (BMR) in pre-adolescent and adolescent children **55,** 136A, 1996
Dietary restraint and nutrient intakes of adolescents **55,** 217A, 1996
Influences on adolescent food choice **55,** 345, 1996
Adrenaline
Microdialysis of adipose tissue to assess the effects of adrenaline infusion **55,** 163A, 1996
Adults
Waist:height ratio is a simple anthropometric index which is closely associated with blood pressure in middle-aged British adults **55,** 230A, 1996
Ageing
The effect of age on the utilization of infused glucose studied using the hyperglycaemia glucose clamp **55,** 168A, 1996
Agri-food policy
Consumption implications of agri-food policies **55,** 649, 1996
Albumin
Effect of dietary proteins on the meal stimulation of albumin synthesis in humans. Relations with the precursor pool for protein synthesis **55,** 41A, 1996

Alcohol
The metabolic disposal of [1-^{13}C]ethanol in relation to habitual ethanol consumption in healthy men. **55,** 128A, 1996
Amino acids
Application of a new method for the measurement of circulating peptides **55,** 36A, 1996
Assessment of compatibility of a Paediatric Trace Element injection in a range of total parenteral nutrition mixtures **55,** 198A, 1996
Comparison of apparent absorption of essential amino acids from the small intestine and their net flux across the mesenteric and portal drained viscera of lambs **55,** 63A, 1996
Endogenous nitrogen and amino acid flow in the terminal ileum of preruminant calves fed on skimmed milk, soluble wheat and soyabean isolate proteins **55,** 58A, 1996
Regulation of ammonia and amino acid metabolism in isolated sheep hepatocytes **55,** 39A, 1996
Responses in milk constituent secretion to intravascular administration of two mixtures of amino acids in dairy cows **55,** 100A, 1996
The flooding-dose effect on the incorporation of constantly infused tracer leucine into skeletal muscle: studies with phenylalanine, threonine and arginine **55,** 152A, 1996
The influence of sulphur amino acids on urea-nitrogen salvage **55,** 43A, 1996
Ammonia
Estimation of the enrichment of urea N precursors **55,** 42A, 1996
Anaemia
Anaemia in adolescent girls: effects on cognitive function and activity **55,** 359, 1996
Anaerobic fungi
Anaerobic fungi in the digestive tract of mammalian herbivores and their potential for exploitation **55,** 913, 1996
Anaesthesia
The effects of anaesthesia (Halothane & Chloroform) on postprandial glycogen and lipid synthesis in rats **55,** 167A, 1996
Anthropometry
Anthropometric characteristics of immigrants and non-immigrants in Canada **55,** 229A, 1996
Body mass index characteristics of elderly slum dwellers in Bombay **55,** 141A, 1996
Comparison of weight and height based indices for assessment of the risk of death in severely malnourished children **55,** 82A, 1996
Predicting body composition in adults **55,** 85A, 1996
Relationship of biscuit, cake and confectionery consumption to body mass index and energy intake in Scottish women **55,** 122A, 1996
Staff use and quality of anthropometric measures in a children's hospital **55,** 254A, 1996
The effect of feeding and weaning practice on growth and nutritional status of Glasgow boys and girls in the first year of life **55,** 247A, 1996
The relationship between arm-span and height in different ethnic groups **55,** 84A, 1996
Use of the waist:height ratio to assess the risks of obesity **55,** 83A, 1996
Waist:height ratio is a simple anthropometric index which is closely associated with blood pressure in middle-aged British adults **55,** 230A, 1996
Antioxidants
Antioxidant supplementation decreases both endogenous and induced oxidative DNA damage in human lymphocytes **55,** 33A, 1996
Plasma concentrations of carotenoids and antioxidant vitamins in smokers and non-smokers **55,** 93A, 1996
The role of antioxidants in nutritional support **55,** 945, 1996
Variability in intake of fats and antioxidant vitamins assessed by multiple 7-day weighed dietary records **55,** 245A, 1996
Apolipoproteins
A specific enzyme-linked immunosorbent assay for the measurement of apolipoprotein B-48 in triacylglycerol-rich lipoproteins **55,** 112A, 1996
Apple juice
Hyperosmolality of apple juice is not the main factor which promotes water secretion in the intact human jejunum **55,** 9A, 1996
Ascorbic acid
A comparison of saliva and plasma ascorbic acid **55,** 87A, 1996
Measurement of stable isotope [^{13}C]ascorbate using gas chromatography with mass spectrometry (GCMS) **55,** 88A, 1996
The effect of ascorbic loading on ascorbyl radical formation in patients with sepsis and healthy subjects **55,** 89A, 1996
Asian foods
Comparison of a food-frequency questionnaire with a 4 d weighed record in South Asians **55,** 75A, 1996
Provision of Asian foods in hospital **55,** 74A, 1996
Aspartame
The effect of sucrose- and aspartame-sweetened drinks on energy intake, hunger and food choice of female, slightly restrained eaters **55,** 124A, 1996
Atherogenesis
Potentially atherogenic chylomicron remnants are present in the low-density lipoprotein fraction as detected by a specific antibody to apolipoprotein B-48 **55,** 113A, 1996
Basal metabolic rate
Basal metabolic rate (BMR) in pre-adolescent and adolescent children **55,** 136A, 1996
Intra individual variation in the basal metabolic rate of women: the effect of the menstrual cycle **55,** 135A, 1996

Birth weight
The relationship between women's birth weight and their current cardiovascular function **55,** 253A, 1996

Blood
A prospective evaluation of central venous blood flow using Doppler ultrasound in patients with long-term central venous catheters **55,** 208A, 1996
Dose-response effects of dietary carrageenan (from *Eucheuma cottonii*) on blood lipids and gut tissues of rats **55,** 54A, 1996

Body composition
A comparison of methods for measuring changes in fat-free mass with the acquired immune deficiency syndrome **55,** 153A, 1996
Predicting body composition in adults **55,** 85A, 1996
The effects of environmental temperature and photoperiod on the body composition and properties of the pelt in the Djungarian hamster, *Phodopus campbelli* **55,** 104A, 1996

Body mass index
Confectionery, biscuits, cakes and desserts *v.* fresh fruit: influence of body mass index **55,** 241A, 1996
Interviewees with higher body mass index were less likely to return diet diaries in a longitudinal national survey **55,** 218A, 1996
Low sugar intakes are associated with high body mass index in the Dietary and Nutritional Survey of British Adults **55,** 123A, 1996

Body weight
Energy expenditure during heavy work and its interaction with body weight **55,** 126A, 1996

Bone
A study of bone growth in adolescent girls: the effect of an 18-month, milk-based dietary intervention **55,** 11A, 1996
An epidemiological investigation into the influence of diet on bone mass **55,** 10A, 1996
Effects of dietary and non-dietary factors on bone metabolism in women **55,** 12A, 1996

Brain
Glucose transporters in the brain **55,** 209, 1996

Cachexia
The effect of inhibiting gluconeogenesis on protein synthesis in cachectic tumour-bearing rats **55,** 155A, 1996

Canada
Anthropometric characteristics of immigrants and non-immigrants in Canada **55,** 229A, 1996

Cancer
Case report: the nutritional management of a man treated for head and neck cancer **55,** 188A, 1996
Increased fibrinogen synthesis in cancer patients: implications for nitrogen economy **55,** 248A, 1996
Screening for malnutrition in oncology patients **55,** 181A, 1996
Survival of patients with metastatic colorectal cancer correlates with indices reflecting the inflammatory response, but not with weight loss **55,** 182A, 1996

Carbohydrate
Acute effects of high-sucrose *v.* high-starch diets on insulin sensitivity in healthy volunteers **55,** 169A, 1996

Carbohydrate intake
Effect of *ad libitum* intake of high-carbohydrate or high-fat diet on nutrient balances **55,** 224A, 1996
The effects of alterations in dietary carbohydrate intake on running performance during a 10 km treadmill time trial **55,** 134A, 1996
The effects of alterations in dietary carbohydrate intake on the performance of prolonged high intensity exercise in well-trained individuals **55,** 236A, 1996

Carbonated beverages
Effects of carbonated beverages on eating behaviour over seven days **55,** 251A, 1996

Carrageenan
Dose-response effects of dietary carrageenan (from *Eucheuma cottonii*) on blood lipids and gut tissues of rats **55,** 54A, 1996

Casein
Adjustment of the expression of digestive enzymes to casein level in food in *Penaeus vannamei* (Crustacea, Decapoda) **55,** 14A, 1996

Cat nutrition
Energy expenditure of adult cats estimated using the doubly-labelled-water method, indirect calorimetry and activity monitoring **55,** 129A, 1996
Taurine metabolism in cats fed on commercial canned or dry foods **55,** 65A, 1996

Childhood
An open prospective randomized comparison of a newly available high-energy enteral feed, with a conventional formula designed for children 1–6 years **55,** 185A, 1996
Home gastrostomy feeding in children and the role of a nutrition nurse **55,** 193A, 1996
Malnutrition in a Scottish children's hospital **55,** 184A, 1996
The gastrointestinal handling and metabolic disposal of [1-^{13}C]palmitic acid in normal, healthy children **55,** 6A, 1996

Chloride
Production by the intestinal cell line HT29 cl.19A of arachidonic acid 5-lipoxygenase metabolites and their effect on electrogenic chloride secretion **55,** 15A, 1996

Chylomicrons
Size and clearance of chylomicrons after different fat loads in young women **55,** 110A, 1996

Clinical assessment
Clinical assessment in primary care: professional cooperation **55,** 679, 1996

Clinical management
Screening for nutritional risk **55,** 841, 1996
The management of malnutrition in hospital **55,** 855, 1996

Colon
Fermentation of non-digestible oligosaccharides by human colonic bacteria **55,** 899, 1996
Importance of the colon as a source of circulating glucagon-like peptide 1 **55,** 234A, 1996
In vitro fermentation of carbohydrate by faecal bacteria of young children in Glasgow and young urban black children in Johannesburg **55,** 239A, 1996
The role of butyrate in human colonic epithelial cells: an energy source or inducer of differentiation and apoptosis? **55,** 937, 1996

Complex carbohydrates
A physico-chemical perspective of plant polysaccharides in relation to glucose absorption, insulin secretion and the entero-insular axis **55,** 881, 1996
Anaerobic fungi in the digestive tract of mammalian herbivores and their potential for exploitation **55,** 913, 1996
Fermentation of non-digestible oligosaccharides by human colonic bacteria **55,** 899, 1996
The analysis of complex carbohydrates: relevance of values obtained *in vitro* **55,** 863, 1996
The role of butyrate in human colonic epithelial cells: an energy source or inducer of differentiation and apoptosis? **55,** 937, 1996
The use of ^{14}C-labelled substrates to study plant cell wall breakdown in the gastrointestinal tract **55,** 927, 1996

Control of development
Aspects of gut development **55,** 519, 1996
Influence of thyroid hormones and temperature on adipose tissue development and lung maturation **55,** 561, 1996
Lung maturation **55,** 529, 1996
Regulatory factors in the control of muscle development **55,** 543, 1996

Coronary heart disease
Coronary heart disease mortality in Peninsular Malaysia **55,** 138A, 1996

Cyclic AMP
Cyclic AMP modulates adipogenesis in 3T3-F442A cells **55,** 24A, 1996

Cyproheptadine
Does the histamine receptor antagonist, cyproheptadine increase voluntary food intake? **55,** 252A, 1996

Cystic fibrosis
Colonic fermentation capacity is reduced in children with cystic fibrosis **55,** 49A, 1996
Factors affecting nutrition in early cystic fibrosis: resting energy expenditure, pulmonary inflammatory markers, body composition and genotype in a neonatally-screened population **55,** 180A, 1996
Overnight percutaneous endoscopic gastrostomy (PEG) feeding using an elemental formula in adolescents and adults with cystic fibrosis **55,** 200A, 1996
The gastrointestinal handling and metabolic disposal of [1-^{13}C]palmitic acid in patients with cystic fibrosis **55,** 5A, 1996

Cytokines
Altered macrophage GTPase activity may not exclusively modify TNF-induced macrophage IL1 or IL6 production **55,** 29A, 1996

Dental caries
A preliminary comparison of the frequency of sugar intake by 8–14 year old children in Tristan da Cunha and a region of Scotland **55,** 242A, 1996

Developing countries
Adolescent Kingston girls' school achievement: nutrition, health and social factors **55,** 333, 1996
Adolescent nutritional status in developing countries **55,** 321, 1996

Dietary assessment
Comparison of a food-frequency questionnaire with a 4 d weighed record in South Asians **55,** 75A, 1996
Comparison of dietary assessment methods for energy and fat in a group of young and middle-aged men **55,** 79A, 1996

Dietary carbohydrate
Measurement of unabsorbed dietary carbohydrates and their fermentation products following the ingestion of ^{13}C carbohydrates in patients with malabsorption syndrome **55,** 8A, 1996

Dietary changes
Changes over seven years in dietary patterns in the Health and Lifestyle Survey population **55,** 78A, 1996
Movement towards a healthier diet in Tayside between 1984 and 1994 **55,** 240A, 1996
Undertaking dietary change: perceptions of ten dietary changes **55,** 77A, 1996

Dietary fat
Dietary lipids affect the sensitivity of rat thymic lymphocytes to glucocorticoids **55,** 160A, 1996
Effects of fish oil, olive oil and maize oil on the metabolic responses to turpentine-induced inflammation in the rat **55,** 159A, 1996
Influence of variation in dietary fatty acid composition on von Willebrand's factor concentration in healthy men **55,** 164A, 1996

Dietary fibre
The effect of dietary fibre upon rat peripheral blood lymphocyte proliferation **55,** 161A, 1996

Dietary intake
Changing dietary intake: a plate model approach **55,** 76A, 1996
Nutrient sources of *trans* fatty acids in the Scottish population (1984–1986) **55,** 212A, 1996

Dietary intervention
'Fruit instead of cakes?': an evaluation of a fat-lowering dietary intervention **55,** 120A, 1996
Dietary preferences
The physiological basis of dietary preferences in West Midlands behaviourally resistant house mice **55,** 223A, 1996
Dietary protein
Effect of dietary proteins on the meal stimulation of albumin synthesis in humans. Relations with the precursor pool for protein synthesis **55,** 41A, 1996
Endogenous nitrogen and amino acid flow in the terminal ileum of preruminant calves fed on skimmed milk, soluble wheat and soyabean isolate proteins **55,** 58A, 1996
Modulated role of proteolytic enzymes in the digestion of food proteins **55,** 56A, 1996
Dietary surveys
Clinical assessment in primary care: professional cooperation **55,** 679, 1996
Different techniques of food preparation and cooking: implication for dietary surveys **55,** 671, 1996
Food photographs improve estimates of nutrient intake in dietary surveys **55,** 205A, 1996
Integration of nutritional data based on household budget surveys in European countries **55,** 699, 1996
Interviewees with higher body mass index were less likely to return diet diaries in a longitudinal national survey **55,** 218A, 1996
Nutrition assessment and dietary guidelines: experience from the Dutch Nutrition Surveillance System **55,** 705, 1996
Nutrition surveillance in Ireland **55,** 689, 1996
DNA sequencing
DNA sequencing **55,** 605, 1996

Eating behaviour
Effects of carbonated beverages on eating behaviour over seven days **55,** 251A, 1996
Elderly
Can nurses identify nutritionally depleted elderly patients? **55,** 186A, 1996
Factors influencing postprandial protein utilization in adults and the elderly **55,** 69A, 1996
Management of malnutrition in the elderly: a clinical audit **55,** 175A, 1996
Prediction of limb muscle in men over 75 years of age **55,** 86A, 1996
Endotoxins
Impairment of interleukin-2 production and increased spontaneous tumour necrosis factor production by peripheral blood mononuclear cells may facilitate an exaggerated response to circulating endotoxins in humans **55,** 157A, 1996
Energy balance
Factors affecting nutrition in early cystic fibrosis: resting energy expenditure, pulmonary inflammatory markers, body composition and genotype in a neonatally-screened population **55,** 180A, 1996
Negative energy balance in patients hospitalized with exacerbation of chronic obstructive lung disease **55,** 133A, 1996
The effect of meal frequency and energy restriction on total energy expenditure and spontaneous activity in obese subjects in a chamber calorimeter **55,** 216A, 1996
Energy expenditure
Energy expenditure during heavy work and its interaction with body weight **55,** 126A, 1996
Energy expenditure of adult cats estimated using the doubly-labelled-water method, indirect calorimetry and activity monitoring **55,** 129A, 1996
First measurements of resting metabolic rate (RMR), diet-induced thermogenesis (DIT) and respiratory quotient (RQ) in lithium-treated patients **55,** 127A, 1996
Inter-animal variability in the energy expenditure of splanchnic tissues in preruminant calves **55,** 61A, 1996
Measurement of total energy expenditure in patients with human immunodeficiency virus infection using the bicarbonate-urea method **55,** 154A, 1996
Report of Macronutrient Metabolism Group Workshop **55,** 725, 1996
The role of lifestyle in health: the epidemiology and consequences of inactivity **55,** 829, 1996
Total energy expenditure, basal metabolic rate and activity plus thermogenesis before and after elective vertical band gastroplasty in obese females **55,** 206A, 1996
Energy intake
Comparison of dietary assessment methods for energy and fat in a group of young and middle-aged men **55,** 79A, 1996
Differences in reported macronutrient composition of the diet in overweight and lean individuals are dependent on validity of reported energy intakes **55,** 232A, 1996
Recent trends towards reducing energy prescription in parenteral nutrition patients: implications for clinical practice **55,** 179A, 1996
Energy metabolism
Comparisons of metabolic responses to digestible and partly indigestible starches in healthy humans **55,** 7A, 1996
Energy supply
A comparison of potential energy supply from smallholder production with population's energy requirement in Malawi **55,** 130A, 1996
Enteral nutrition
A prospective study of nutritional changes and of gastrostomy feeding in motor neurone disease **55,** 146A, 1996
A randomized comparison of percutaneous endoscopic gastrostomy feeding and nasogastric tube feeding following acute

dysphagic stroke **55,** 147A, 1996
A comparison of pre-operative percutaneous endoscopic gastrostomy feeding with standard management in patients undergoing major head and neck surgery for cancer **55,** 191A, 1996
An open prospective randomized comparison of a newly available high-energy enteral feed, with a conventional formula designed for children 1–6 years **55,** 185A, 1996
Continuous enteral feeding impairs gallbladder contractility in newborn infants **55,** 183A, 1996
Cross-contamination of enteral feeding systems via the luer connector: a preliminary study **55,** 201A, 1996
Gastrostomy feeding: a consumer survey by the LITRE working party **55,** 203A, 1996
Home gastrostomy feeding in children and the role of a nutrition nurse **55,** 193A, 1996
Minimal enteral feeding promotes gallbladder contractility in neonates **55,** 148A, 1996
Overnight percutaneous endoscopic gastrostomy (PEG) feeding using an elemental formula in adolescents and adults with cystic fibrosis **55,** 200A, 1996
Percutaneous endoscopic gastrostomy for stroke: increasing or evolving? **55,** 176A, 1996
Pumps and stands limit mobility, but sleep is uninterrupted: home enteral feeding **55,** 189A, 1996
Small but all that's needed. 9Ch Freka percutaneous endoscopic gastrostomies (PEG) may last 2 years **55,** 194A, 1996

Environmental temperature
The effects of ambient temperature on substrate utilization during prolonged moderate intensity exercise in man **55,** 131A, 1996
The effects of environmental temperature and photoperiod on the body composition and properties of the pelt in the Djungarian hamster, *Phodopus campbelli* **55,** 104A, 1996

Ethnic origin
The relationship between arm-span and height in different ethnic groups **55,** 84A, 1996

Exercise
Effects of exercise training with food selection on GLUT4 glucose transporter expression in insulin-sensitive tissues in the rat **55,** 20A, 1996
The effects of alterations in dietary carbohydrate intake on running performance during a 10 km treadmill time trial **55,** 134A, 1996
The effects of alterations in dietary carbohydrate intake on the performance of prolonged high intensity exercise in well-trained individuals **55,** 236A, 1996

Factor VII
Effect of different patterns of fat intake on postprandial lipaemia and factor VII coagulant activity **55,** 227A, 1996
Influence of *n*-3 fatty acids on postprandial lipaemia and factor VII coagulant activity **55,** 173A, 1996
Modulating influence of alcohol and aspirin on postprandial lipaemia and factor VIIc in male subjects **55,** 226A, 1996

Faeces
Detection of enriched [1-^{13}C]palmitic acid in human stool samples by gas chromatography-isotope ratio mass spectrometry **55,** 111A, 1996

Fat digestion
Regulation of lumen fat digestion: enzymic aspects **55,** 5, 1996

Fat intake
'Fruit instead of cakes?': an evaluation of a fat-lowering dietary intervention **55,** 120A, 1996
Effect of *ad libitum* intake of high-carbohydrate or high-fat diet on nutrient balances **55,** 224A, 1996
Effect of different patterns of fat intake on postprandial lipaemia and factor VII coagulant activity **55,** 227A, 1996
Effect of reduced-fat and reduced-sugar food use on diet and weight status of free-living consumers **55,** 215A, 1996
Effects of eicosapentaenoic acid and docosahexaenoic acid alone or in combination on plasma lipids and hepatic fatty acid oxidation in rats fed on high-fat diets **55,** 108A, 1996
Expression of fatty-acid-binding-proteins (FABP) along the small intestine in mice: effects of a high-fat diet and fatty acids **55,** 16A, 1996
Food consumption patterns and misclassification of total fat intake of individuals **55,** 2A, 1996
Gastric lipase activity is modulated by dietary fat intake in human subjects **55,** 72A, 1996
How the fatty acid composition of previous high-fat diets affects lipid absorption in rats **55,** 52A, 1996
Investigation of the action of a preload of incorporated or added fat on appetite ratings and food consumption **55,** 3A, 1996
Oxidized lipids in food **55,** 246A, 1996
Size and clearance of chylomicrons after different fat loads in young women **55,** 110A, 1996
The effect of dietary lipid manipulation upon fuel utilization by rat lymphocytes **55,** 117A, 1996
Variability in intake of fats and antioxidant vitamins assessed by multiple 7-day weighed dietary records **55,** 245A, 1996

Fatty-acid-binding proteins
Effect of glucocorticoids on the fatty-acid-binding protein (FABP) expression in rat liver **55,** 17A, 1996
Expression of fatty-acid-binding-proteins (FABP) along the small intestine in mice: effects of a high-fat diet and fatty acids **55,** 16A, 1996

Fatty acids
Influence of *n*-3 fatty acids on postprandial lipaemia and factor VII coagulant activity **55,** 173A, 1996

Placental transfer of fatty acids from the maternal to the fetal circulation studied in the perfused human placenta **55,** 114A, 1996
Postprandial serum promoted cholesterol efflux depends on fatty acid composition of the oral load **55,** 71A, 1996
Rapid entry of dietary fatty acids into the plasma non-esterified fatty acid pool **55,** 162A, 1996
The effect of varying *n*-6:*n*-3 fatty acid ratio of the diet upon blood lipid concentrations in the rat **55,** 166A, 1996
The influence of a modified diet on the activity of the delta-6-desaturase enzyme in men **55,** 255A, 1996
The scientific rationale and clinical application of short-chain fatty acids and medium-chain triacylglycerols **55,** 49, 1996

Feed preferences
Effects of exercise training with food selection on GLUT4 glucose transporter expression in insulin-sensitive tissues in the rat **55,** 20A, 1996

Fermentation
Colonic fermentation capacity is reduced in children with cystic fibrosis **55,** 49A, 1996
In vitro fermentation of carbohydrate by faecal bacteria of young children in Glasgow and young urban black children in Johannesburg **55,** 239A, 1996
The effect of weaning practice on fermentation capacity in breast-fed babies **55,** 48A, 1996

Fibrinogen
Increased fibrinogen synthesis in cancer patients: implications for nitrogen economy **55,** 248A, 1996

Flavonoids
Epidemiological evidence on potential health properties of flavonoids **55,** 385, 1996

Food choice
Eating behaviour, food preferences and dietary intake in relation to obesity and body-weight status **55,** 803, 1996
Influences on adolescent food choice **55,** 345, 1996

Food-frequency questionnaire
Movement towards a healthier diet in Tayside between 1984 and 1994 **55,** 240A, 1996

Food intake
Changes over seven years in dietary patterns in the Health and Lifestyle Survey population **55,** 78A, 1996
Confectionery, biscuits, cakes and desserts *v.* fresh fruit: influence of body mass index **55,** 241A, 1996
Consumption of cakes, biscuits and confectionery by British schoolchildren: association with nutrient intakes **55,** 121A, 1996
Factors influencing final consumption of fruit and vegetables in Scotland: some preliminary results **55,** 119A, 1996
Food consumption patterns and misclassification of total fat intake of individuals **55,** 2A, 1996
Investigation of the action of a preload of incorporated or added fat on appetite ratings and food consumption **55,** 3A, 1996
Macronutrients, appetite and day-to-day food intake in humans **55,** 4A, 1996
Relationship of biscuit, cake and confectionery consumption to body mass index and energy intake in Scottish women **55,** 122A, 1996
The effect of meal frequency and energy restriction on total energy expenditure and spontaneous activity in obese subjects in a chamber calorimeter **55,** 216A, 1996
The use of *n*-3 polyunsaturated fatty acid-enriched foods in a dietary intervention study of middle-aged men **55,** 80A, 1996
Undertaking dietary change: perceptions of ten dietary changes **55,** 77A, 1996

Food photography
Food photographs improve estimates of nutrient intake in dietary surveys **55,** 205A, 1996

Food preparation
Different techniques of food preparation and cooking: implication for dietary surveys **55,** 671, 1996

Free radicals
Differential susceptibility of respiratory chain enzymes and lipids to peroxidation in liver mitochondria: use of compounds generating free radicals within aqueous or hydrophobic regions **55,** 94A, 1996

Fructose
Acute augmentation of postprandial lipaemia by fructose **55,** 171A, 1996

Fructose transporters
Differential regulation of the fructose transporters GLUT2 and GLUT5 in the intestinal cell line Caco-2 **55,** 201, 1996

Gastric bypass
Effect of food restriction on protein metabolism in obesity treated by gastric bypass surgery **55,** 47A, 1996

Gastric emptying
The effect of volume and glucose concentration on the gastric emptying rate of glucose solutions in man **55,** 235A, 1996

Gastric lipase
Gastric lipase activity is modulated by dietary fat intake in human subjects **55,** 72A, 1996

Gastrointestinal secretion
Control of gastric secretion **55,** 251, 1996
Intestinal adaptation to nutritional stress **55,** 279, 1996
Molecular control of peptide hormone and receptor expression **55,** 265, 1996
Neural integration of tissue and whole-animal regulation of digestive secretions **55,** 307, 1996
Nutrient-induced secretion and metabolic effects of glucose-dependent insulinotropic polypeptide and glucagon-like peptide-1 **55,** 291, 1996

Recent aspects of the regulation of intestinal mucus secretion **55,** 259, 1996
Regulation of gastrointestinal secretion: symposium overview **55,** 247, 1996

Gene cloning
Gene cloning: studies of nutritional regulation of gene expression **55,** 575, 1996

Gene expression
Elevated expression of the *ob* (obese) gene in white adipose tissue of diabetic (*db/db*) mice **55,** 28A, 1996
Nutritional regulation of the expression of the *ob* (obese) gene in white adipose tissue of mice **55,** 27A, 1996

Glucagon-like peptide 1
Importance of the colon as a source of circulating glucagon-like peptide 1 **55,** 234A, 1996

Glucocorticoids
Effect of a maternal diet low in protein on glucocorticoid-sensitive brain enzyme activities **55,** 45A, 1996
Effect of glucocorticoids on the fatty-acid-binding protein (FABP) expression in rat liver **55,** 17A, 1996
Modulation of blood pressure by glucocorticoids in the rat **55,** 220A, 1996
Programming of the hypothalamic-pituitary-adrenal (HPA) axis by the maternal diet in the rat **55,** 221A, 1996

Glucose
Long-term glucose homeostasis in patients on home parenteral nutrition **55,** 178A, 1996
The effect of age on the utilization of infused glucose studied using the hyperglycaemic glucose clamp **55,** 168A, 1996
The effect of volume and glucose concentration on the gastric emptying rate of glucose solutions in man **55,** 235A, 1996
The effects of meal frequency on postprandial plasma glucose tolerance, glucose dependent insulinotropic polypeptide and insulin concentrations **55,** 102A, 1996

Glucose transporters
Differential regulation of the fructose transporters GLUT2 and GLUT5 in the intestinal cell line Caco-2 **55,** 201, 1996
Facilitative glucose transporters in ruminants **55,** 221, 1996
Glucose transporters in obesity **55,** 237, 1996
Glucose transporters in the brain **55,** 209, 1996
Hormonal regulation of the insulin-responsive glucose transporter, GLUT4: some recent advances **55,** 179, 1996
Intestinal sodium-dependent D-glucose co-transporter: dietary regulation **55,** 167, 1996
Over-expression of GLUT4 selectively in adipose tissue in transgenic mice: implications for nutrient partitioning **55,** 191, 1996
Variations in GLUT4 protein content among bovine adipose tissues **55,** 21A, 1996

Glucosinolates
Glucosinolates in Brassica: occurrence and significance as cancer-modulating agents **55,** 433, 1996

Glucostatic theory
Carbohydrate balance and body-weight regulation **55,** 449, 1996
Dietary macronutrients and glucostatic control of feeding **55,** 467, 1996
Glucostatic control of intake and obesity **55,** 485, 1996
Metabolic and glucostatic control of feeding **55,** 497, 1996

Glutamine
A simplified method for compounding glutamine-enriched total parenteral nutrition (TPN) mixtures **55,** 197A, 1996
Glutaminase (*EC* 3.5.1.2) and glutamine (*EC* 6.3.1.2) activities in the gastrointestinal tract of humans **55,** 172A, 1996
Glutamine utilization by the healthy rabbit intestinal epithelium, *in vitro*, using [^{14}C]- and [^{15}N]glutamine **55,** 57A, 1996

Gluten
Rat serum HDL_2-HDL_3 compositions are not affected by the consumption of different gluten intakes whereas lecithin-cholesterol-acyltransferase activity is altered **55,** 64A, 1996

Glycine
The influence of glycine on urea-nitrogen salvage **55,** 219A, 1996

Glycogen
The effect of Acipimox administration on the contribution of different pathways to postprandial glycogen synthesis in cachectic tumour-bearing rats **55,** 170A, 1996
The effects of anaesthesia (Halothane & Chloroform) on postprandial glycogen and lipid synthesis in rats **55,** 167A, 1996

Growth
Effect of growth hormone administration on growth rate and plasma IGF-1 in milk- and solid-fed lambs **55,** 101A, 1996
Weight and length of Glasgow infants compared with Tanner and Whitehouse standards and new British standards for growth **55,** 81A, 1996

Growth hormone
Regulation of the antilipolytic effect of adenosine in sheep adipose tissue by growth hormone **55,** 26A, 1996

Guar gum
Comparative gastrointestinal responses to guar gum and a seaweed polysaccharide (sodium alginate) in rats **55,** 55A, 1996

Health education
Preferences for approaches to 'healthy eating' education among South Asian family members in Scotland **55,** 243A, 1996

Heart
The relationship between women's birth weight and their current cardiovascular function **55,** 253A, 1996

Hepatocytes
Regulation of ammonia and amino acid metabolism in isolated sheep hepatocytes **55,** 39A, 1996
VLDL binding by isolated hepatocytes in rats fed on animal or vegetable protein diets (100, 200 or 300 g casein or soyabean proteins/kg) **55,** 70A, 1996
HIV infection
Measurement of total energy expenditure in patients with human immunodeficiency virus infection using the bicarbonate-urea method **55,** 154A, 1996
Hospital nutrition
The management of malnutrition in hospital **55,** 855, 1996
Hospital patients
A caterers' perception of feeding patients in hospital **55,** 195A, 1996
A comparison between oral and nasogastric nutritional supplements in malnourished patients **55,** 145A, 1996
A comparison of pre-operative percutaneous endoscopic gastrostomy feeding with standard management in patients undergoing major head and neck surgery for cancer **55,** 191A, 1996
A randomized comparison of percutaneous endoscopic gastrostomy feeding and nasogastric tube feeding following acute dysphagic stroke **55,** 147A, 1996
Can nurses identify nutritionally depleted elderly patients? **55,** 186A, 1996
Cross-contamination of enteral feeding systems via the luer connector: a preliminary study **55,** 201A, 1996
Malnutrition in a Scottish children's hospital **55,** 184A, 1996
Nutrition screening of acute in-patients **55,** 144A, 1996
Provision of Asian foods in hospital **55,** 74A, 1996
Staff use and quality of anthropometric measures in a children's hospital **55,** 254A, 1996
Household budget
Integration of nutritional data based on household budget surveys in European countries **55,** 699, 1996
House mouse
The physiological basis of dietary preferences in West Midlands behaviourally resistant house mice **55,** 223A, 1996
Hypertension
Modulation of blood pressure by glucocorticoids in the rat **55,** 220A, 1996
Post-weaning dietary manipulation reduces blood pressure in rats with hypertension of fetal origin **55,** 103A, 1996

ICONS
Nutrition information and support for overseas members **55,** 619, 1996
IGF-1
Effect of growth hormone administration on growth rate and plasma IGF-1 in milk- and solid-fed lambs **55,** 101A, 1996
Effects of some alterations in diets for weaned piglets on serum thyroid hormone and IGF-I concentrations **55,** 99A, 1996
Ileostomy
Is the ileostomist a good model for studies of starch digestion in man? **55,** 50A, 1996
Immune function
A comparison of methods for measuring changes in fat-free mass with the acquired immune deficiency syndrome **55,** 153A, 1996
Altered macrophage GTPase activity may not exclusively modify TNF-induced macrophage IL1 or IL6 production **55,** 29A, 1996
Cellular and humoral immune responses in soyabean protein fed preruminant calves **55,** 97A, 1996
Dietary lipids affect the sensitivity of rat thymic lymphocytes to glucocorticoids **55,** 160A, 1996
Effects of fatty acids and dietary lipids on cells of the immune system **55,** 127, 1996
Immunomodulatory and anti-inflammatory effects of *n*-3 polyunsaturated fatty acids **55,** 737, 1996
Interactions between adipose tissue and the immune system **55,** 111, 1996
India
Body mass index characteristics of elderly slum dwellers in Bombay **55,** 141A, 1996
Infants
Selenium content of UK available infant formulas and estimation of the intake of bottle-fed infants **55,** 222A, 1996
Transfer of ^{15}N from urea to the circulating lysine pool in the human infant **55,** 37A, 1996
Weight and length of Glasgow infants compared with Tanner and Whitehouse standards and new British standards for growth **55,** 81A, 1996
Inflammation
Effects of fish oil, olive oil and maize oil on the metabolic responses to turpentine-induced inflammation in the rat **55,** 159A, 1996
Survival of patients with metastatic colorectal cancer correlates with indices reflecting the inflammatory response, but not with weight loss **55,** 182A, 1996
Insulin
A comparison of insulin-stimulated glucose uptake in isolated adipocytes from different fat deposits. Does glucagon-like peptide 1 enhance uptake? **55,** 228A, 1996
Acute effects of high-sucrose *v.* high-starch diets on insulin sensitivity in healthy volunteers **55,** 169A, 1996
Altered insulin response to a glucose load in rats following exposure to a low-protein diet *in utero* **55,** 44A, 1996
Hormonal regulation of the insulin-responsive

glucose transporter, GLUT4: some recent advances **55,** 179, 1996
Number and affinity of subcutaneous insulin receptors during growth in Large White and Meishan pigs **55,** 66A, 1996

Intensive care patients
Survival of intensive care patients given glutamine-supplemented parenteral nutrition: a double-blind, randomized treatment study **55,** 158A, 1996

Intestine
Are radio-opaque pellets suitable markers for upper intestinal transit studies in human volunteers? **55,** 250A, 1996
Aspects of gut development **55,** 519, 1996
Comparative gastrointestinal responses to guar gum and a seaweed polysaccharide (sodium alginate) in rats **55,** 55A, 1996
Comparison of apparent absorption of essential amino acids from the small intestine and their net flux across the mesenteric and portal drained viscera of lambs **55,** 63A, 1996
Comparison of two algal polysaccharides with guar gum and cellulose on bowel habit in healthy human volunteers **55,** 238A, 1996
Dietary zinc prevents intestinal dysfunction in malnourished milk-sensitized guinea-pigs **55,** 51A, 1996
Digestion of maize starch and native pea starch in the small intestine of pigs **55,** 59A, 1996
Glutaminase (*EC* 3.5.1.2) and glutamine (*EC* 6.3.1.2) activities in the gastrointestinal tract of humans **55,** 172A, 1996
Glutamine utilization by the healthy rabbit intestinal epithelium, *in vitro*, using [^{14}C]- and [^{15}N]glutamine **55,** 57A, 1996
Intestinal sodium-dependent D-glucose co-transporter: dietary regulation **55,** 167, 1996
Production by the intestinal cell line HT29 cl.19A of arachidonic acid 5-lipoxygenase metabolites and their effect on electrogenic chloride secretion **55,** 15A, 1996
The effects of riboflavin depletion and repletion on the structure and cytokinetics of the small intestine **55,** 96A, 1996

***In vitro* analysis**
The analysis of complex carbohydrates: relevance of values obtained *in vitro* **55,** 863, 1996

Iodine
Sources of iodine in the vegan diet **55,** 13A, 1996

Iron
Does iron consumption protect against anaemia in pregnancy? **55,** 142A, 1996
The quantification of non-transferrin-bound iron in plasma samples from neonates, using high performance liquid chromatography **55,** 95A, 1996

Isotope labelling
The use of ^{14}C-labelled substrates to study plant cell wall breakdown in the gastrointestinal tract **55,** 927, 1996

Jejunum
Hyperosmolality of apple juice is not the main factor which promotes water secretion in the intact human jejunum **55,** 9A, 1996

Lactose-ureide
Metabolism of lactose-ureide labelled with ^{15}N and ^{13}C in humans **55,** 38A, 1996

Leptin
New insights into the development of obesity: obese genes and the leptin system **55,** 783, 1996

Leukaemia
Resting metabolic rate and excess weight gain during maintenance chemotherapy for childhood acute lymphoblastic leukaemia **55,** 132A, 1996

Linoleic acid
The influence of a modified diet on the activity of the delta-6-desaturase enzyme in men **55,** 255A, 1996

Lipid absorption
Adipocyte hormone-sensitive lipase: a major regulator of lipid metabolism **55,** 93, 1996
Cellular and molecular aspects of fat metabolism in the small intestine **55,** 19, 1996
Chairman's introduction **55,** 1, 1996
Disposition of lipids in the postprandial state **55,** 79, 1996
Effects of fatty acids and dietary lipids on cells of the immune system **55,** 127, 1996
Fatty acids and expression of lipid-related genes in adipose cells **55,** 151, 1996
Interactions between adipose tissue and the immune system **55,** 111, 1996
Lipid absorption and hepatic metabolism in ruminants **55,** 39, 1996
Regulation of lumen fat digestion: enzymic aspects **55,** 5, 1996
The scientific rationale and clinical application of short-chain fatty acids and medium-chain triacylglycerols **55,** 49, 1996

Lipids
How the fatty acid composition of previous high-fat diets affects lipid absorption in rats **55,** 52A, 1996

Lipogenesis
Liver and adipose tissue stearoyl-CoA desaturase activity in the growing Meishan pig **55,** 115A, 1996

Lipoprotein lipase
Effects of fasting and refeeding on lipoprotein lipase and GLUT4 gene expression in tissues of lean and genetically obese (*ob/ob*) mice **55,** 19A, 1996
Lipoprotein lipase activity and gene expression in heart and skeletal muscles in the preruminant calf **55,** 18A, 1996

Lipoproteins
A specific enzyme-linked immunosorbent assay for the measurement of apolipoprotein B-48 in triacylglycerol-rich lipoproteins **55,** 112A, 1996

Effect of animal or vegetable protein intakes (100, 200 or 300 g casein or soyabean proteins/kg) on VLDL, HDL and apolipoproteins in the rat **55,** 106A, 1996
Potentially atherogenic chylomicron remnants are present in the low-density lipoprotein fraction as detected by a specific antibody to apolipoprotein B-48 **55,** 113A, 1996
Rat serum HDL_2-HDL_3 compositions are not affected by the consumption of different gluten intakes whereas lecithin-cholesterol-acyltransferase activity is altered **55,** 64A, 1996
VLDL binding by isolated hepatocytes in rats fed on animal or vegetable protein diets (100, 200 or 300 g casein or soyabean proteins/kg) **55,** 70A, 1996

Lithium
First measurements of resting metabolic rate (RMR), diet-induced thermogenesis (DIT) and respiratory quotient (RQ) in lithium-treated patients **55,** 127A, 1996

Liver
Differential susceptibility of respiratory chain enzymes and lipids to peroxidation in liver mitochondria: use of compounds generating free radicals within aqueous or hydrophobic regions **55,** 94A, 1996
Lipid absorption and hepatic metabolism in ruminants **55,** 39, 1996
Nutrition assessment and management of liver transplant patients **55,** 199A, 1996
Nutritional assessment and status of liver transplant candidates **55,** 187A, 1996
Sepsis-induced long-lasting stimulation of liver protein synthesis **55,** 40A, 1996
The metabolic disposal of [1-^{13}C]ethanol in relation to habitual ethanol consumption in healthy men. **55,** 128A, 1996

Lord Boyd Orr Memorial Lecture
'Within a decade no child will go to bed hungry?' **55,** 621, 1996

Lung
Lung maturation **55,** 529, 1996
Negative energy balance in patients hospitalized with exacerbation of chronic obstructive lung disease **55,** 133A, 1996

Lymph nodes
The organisation of adipose tissue surrounding lymph nodes in guinea-pigs and methods of studying local interactions between adipose and lymphoid tissue **55,** 116A, 1996

Lymphocytes
Antioxidant supplementation decreases both endogenous and induced oxidative DNA damage in human lymphocytes **55,** 33A, 1996
Lymphocyte function may influence the inflammatory and metabolic response to tumour necrosis factor and endotoxins in humans **55,** 156A, 1996
The effect of dietary fibre upon rat peripheral blood lymphocyte proliferation **55,** 161A, 1996
The effect of dietary lipid manipulation upon fuel utilization by rat lymphocytes **55,** 117A, 1996

Macronutrients
Dietary macronutrients and glucostatic control of feeding **55,** 467, 1996
Macronutrients, appetite and day-to-day food intake in humans **55,** 4A, 1996
Report of Macronutrient Metabolism Group Workshop **55,** 725, 1996

Malabsorption
Measurement of unabsorbed dietary carbohydrates and their fermentation products following the ingestion of ^{13}C carbohydrates in patients with malabsorption syndrome **55,** 8A, 1996

Malawi
A comparison of potential energy supply from smallholder production with population's energy requirement in Malawi **55,** 130A, 1996

Malaysia
Coronary heart disease mortality in Peninsular Malaysia **55,** 138A, 1996

Malnutrition
A caterers' perception of feeding patients in hospital **55,** 195A, 1996
Case report: the nutritional management of a man treated for head and neck cancer **55,** 188A, 1996
Comparison of weight and height based indices for assessment of the risk of death in severely malnourished children **55,** 82A, 1996
Management of malnutrition in the elderly: a clinical audit **55,** 175A, 1996
Screening for malnutrition in oncology patients **55,** 181A, 1996

Meal frequency
The effects of meal frequency on postprandial plasma glucose tolerance, glucose dependent insulinotropic polypeptide and insulin concentrations **55,** 102A, 1996

Meishan pig
Liver and adipose tissue stearoyl-CoA desaturase activity in the growing Meishan pig **55,** 115A, 1996

Menstrual cycle
Intra individual variation in the basal metabolic rate of women: the effect of the menstrual cycle **55,** 135A, 1996

Metabolism
Metabolic and glucostatic control of feeding **55,** 497, 1996

Methionine
Effect of methionine addition to a high-protein diet on growth and energy utilization in the rat **55,** 46A, 1996

Micronutrients
Micronutrient deficiency in a home parenteral nutrition programme **55,** 150A, 1996

Milk
Responses in milk constituent secretion to intravascular administration of two mixtures of

amino acids in dairy cows **55,** 100A, 1996
Molecular biological techniques
Chairmen's introduction **55,** 573, 1996
DNA sequencing **55,** 605, 1996
Gene cloning: studies of nutritional regulation of gene expression **55,** 575, 1996
Northern blotting **55,** 583, 1996
Polymerase chain reaction **55,** 599, 1996
Southern blotting **55,** 591, 1996
Transgenic animals **55,** 613, 1996
Monoclonal antibodies
Administration of an anti-adipocyte monoclonal antibody to piglets: effects on adipose tissue development and lipid content **55,** 23A, 1996
Motor neurone disease
A prospective study of nutritional changes and of gastrostomy feeding in motor neurone disease **55,** 146A, 1996
Mucus
Recent aspects of the regulation of intestinal mucus secretion **55,** 259, 1996
Muscle
Prediction of limb muscle in men over 75 years of age **55,** 86A, 1996
Regulatory factors in the control of muscle development **55,** 543, 1996
The flooding-dose effect on the incorporation of constantly infused tracer leucine into skeletal muscle: studies with phenylalanine, threonine and arginine **55,** 152A, 1996
Myoblasts
A method of transfecting C_2C_{12} myoblasts at all stages of differentiation **55,** 34A, 1996

Neonatal nutrition
Continuous enteral feeding impairs gallbladder contractility in newborn infants **55,** 183A, 1996
Minimal enteral feeding promotes gallbladder contractility in neonates **55,** 148A, 1996
The quantification of non-transferrin-bound iron in plasma samples from neonates, using high performance liquid chromatography **55,** 95A, 1996
Neural pathways
Neural integration of tissue and whole-animal regulation of digestive secretions **55,** 307, 1996
Non-starch polysaccharides
Comparison of two algal polysaccharides with guar gum and cellulose on bowel habit in healthy human volunteers **55,** 238A, 1996
Northern blotting
Northern blotting **55,** 583, 1996
Nutrient intake
An epidemiological investigation into the influence of diet on bone mass **55,** 10A, 1996
Consumption of cakes, biscuits and confectionery by British schoolchildren: association with nutrient intakes **55,** 121A, 1996
Dietary restraint and nutrient intakes of adolescents **55,** 217A, 1996
Effects of dietary and non-dietary factors on bone metabolism in women **55,** 12A, 1996
Nutrition education
Knowledge of nutritional assessment and support within a teaching hospital **55,** 202A, 1996
Nutrition in the medical undergraduate curriculum **55,** 139A, 1996
Nutrition policy
Consumption implications of agri-food policies **55,** 649, 1996
Food and nutrition policy in the Republic of Ireland: where to from here? **55,** 641, 1996
Nutrition policy: priorities for new research **55,** 661, 1996
Nutrition Society Medal Lecture
A solution to the problem of predicting the response of an animal to its diet **55,** 155, 1996
Nutritional screening
Screening for nutritional risk **55,** 841, 1996
Nutritional status
A comparison between oral and nasogastric nutritional supplements in malnourished patients **55,** 145A, 1996
Development of a nutritional assessment tool, highlighting practical considerations **55,** 190A, 1996
Knowledge of nutritional assessment and support within a teaching hospital **55,** 202A, 1996
Nutrition assessment and management of liver transplant patients **55,** 199A, 1996
Nutrition screening of acute in-patients **55,** 144A, 1996
Nutritional assessment and status of liver transplant candidates **55,** 187A, 1996
Nutritional problems following stroke: assessment and clinical implications **55,** 192A, 1996
Nutritional stress
Intestinal adaptation to nutritional stress **55,** 279, 1996
Nutritional support
The role of antioxidants in nutritional support **55,** 945, 1996

Obesity
Carbohydrate balance and body-weight regulation **55,** 449, 1996
Defects in substrate oxidation involved in the predisposition to obesity **55,** 817, 1996
Differences in reported macronutrient composition of the diet in overweight and lean individuals are dependent on validity of reported energy intakes **55,** 232A, 1996
Eating behaviour, food preferences and dietary intake in relation to obesity and body-weight status **55,** 803, 1996
Effect of food restriction on protein metabolism in obesity treated by gastric bypass surgery **55,** 47A, 1996
Effects of fasting and refeeding on lipoprotein lipase and GLUT4 gene expression in tissues of

lean and genetically obese (*ob/ob*) mice **55,** 19A, 1996
Glucose transporters in obesity **55,** 237, 1996
Glucostatic control of intake and obesity **55,** 485, 1996
Identifying the possible causes of maternal obesity **55,** 231A, 1996
New insights into the development of obesity: obese genes and the leptin system **55,** 783, 1996
Non-diet and diet programmes for overweight: effects on mood, lifestyle and health **55,** 214A, 1996
Postprandial exogenous lipid oxidation in obese and normal-weight women **55,** 225A, 1996
Resting metabolic rate and excess weight gain during maintenance chemotherapy for childhood acute lymphoblastic leukaemia **55,** 132A, 1996
The role of altered sympathetic nervous system activity in the pathogenesis of obesity **55,** 793, 1996
The role of lifestyle in health: the epidemiology and consequences of inactivity **55,** 829, 1996
Total energy expenditure, basal metabolic rate and activity plus thermogenesis before and after elective vertical band gastroplasty in obese females **55,** 206A, 1996
Use of the waist:height ratio to assess the risks of obesity **55,** 83A, 1996
Weight loss and factor VIIc activity in overweight subjects **55,** 137A, 1996

Overseas members
Nutrition information and support for overseas members **55,** 619, 1996

Oxidized lipids
Oxidized lipids in food **55,** 246A, 1996

5-Oxoproline
Nitrogen or protein intake and urinary 5-oxoproline excretion in adults **55,** 68A, 1996

Palm oil
The influence of palm oil and palm-oil fractions on protein utilization in the rat **55,** 165A, 1996

Palmitic acid
Detection of enriched [1-^{13}C]palmitic acid in human stool samples by gas chromatography-isotope ratio mass spectrometry **55,** 111A, 1996
The gastrointestinal handling and metabolic disposal of [1-^{13}C]palmitic acid in normal, healthy children **55,** 6A, 1996
The gastrointestinal handling and metabolic disposal of [1-^{13}C]palmitic acid in patients with cystic fibrosis **55,** 5A, 1996

Pancreas
The stability of mRNA encoding some pancreatic hydrolases is modulated by dietary protein intake in the rat **55,** 35A, 1996

Parenteral nutrition
A cost utility analysis of home parenteral nutrition **55,** 177A, 1996
A simplified method for compounding glutamine-enriched total parenteral nutrition (TPN) mixtures **55,** 197A, 1996
Assessment of compatibility of a Paediatric Trace Element injection in a range of total parenteral nutrition mixtures **55,** 198A, 1996
Comparison of constant infusion and flooding methods for measuring muscle protein synthesis: effect of conventional total parenteral nutrition **55,** 151A, 1996
Long-term glucose homeostasis in patients on home parenteral nutrition **55,** 178A, 1996
Micronutrient deficiency in a home parenteral nutrition programme **55,** 150A, 1996
Nights of bright lights and noisy pumps: home parenteral feeding **55,** 149A, 1996
Recent trends towards reducing energy prescription in parenteral nutrition patients: implications for clinical practice **55,** 179A, 1996
Survival of intensive care patients given glutamine-supplemented parenteral nutrition: a double-blind, randomized treatment study **55,** 158A, 1996
The oxygen content of parenteral nutrition admixtures prepared by different methods **55,** 196A, 1996

Penaeus vannamei
Adjustment of the expression of digestive enzymes to casein level in food in *Penaeus vannamei* (Crustacea, Decapoda) **55,** 14A, 1996

Peptide hormones
Molecular control of peptide hormone and receptor expression **55,** 265, 1996
Nutrient-induced secretion and metabolic effects of glucose-dependent insulinotropic polypeptide and glucagon-like peptide-1 **55,** 291, 1996

Peptides
Application of a new method for the measurement of circulating peptides **55,** 36A, 1996
Peptide breakdown by rumen microorganisms is sensitive to inhibition by 1,10-phenanthroline **55,** 237A, 1996

Physico-chemical properties
A physico-chemical perspective of plant polysaccharides in relation to glucose absorption, insulin secretion and the entero-insular axis **55,** 881, 1996

Phyto-oestrogens
Physiological effects of phyto-oestrogens in relation to cancer and other human health risks **55,** 399, 1996

Placenta
Are high fetal vitamin C concentrations due to placental synthesis? **55,** 90A, 1996
Placental transfer of fatty acids from the maternal to the fetal circulation studied in the perfused human placenta **55,** 114A, 1996

Plant foods
Epidemiological evidence on potential health properties of flavonoids **55,** 385, 1996

Glucosinolates in Brassica: occurrence and significance as cancer-modulating agents **55,** 433, 1996
Physiological effects of phyto-oestrogens in relation to cancer and other human health risks **55,** 399, 1996
Physiologically-active compounds in plants: an overview **55,** 371, 1996
Polyamines in human health **55,** 419, 1996

Plasma
Acute augmentation of postprandial lipaemia by fructose **55,** 171A, 1996
Animal or vegetable protein intakes (100, 200 or 300 g casein or soyabean proteins/kg) differentially alter plasma distribution of cholesterol and triacylglycerols in rats **55,** 105A, 1996
Rapid entry of dietary fatty acids into the plasma non-esterified fatty acid pool **55,** 162A, 1996

Plate model
Changing dietary intake: a plate model approach **55,** 76A, 1996

Polyamines
Polyamines in human health **55,** 419, 1996

Polymerase chain reaction
Polymerase chain reaction **55,** 599, 1996

Polyunsaturated fatty acids
Effects of eicosapentaenoic acid and docosahexaenoic acid alone or in combination on plasma lipids and hepatic fatty acid oxidation in rats fed on high-fat diets **55,** 108A, 1996
Effects of *n*-3 polyunsaturated fatty acids on lipid storage-related enzymes in adipose tissue of sucrose-fed insulin resistant rats **55,** 73A, 1996
Involvement of brown adipose tissue in the limiting effect of *n*-3 polyunsaturated fatty acids on obesity induced by a high fat diet in the rat **55,** 109A, 1996
Limitation of the hypertrophy of adipose tissues by fish-oil *n*-3 fatty acids during high-fat feeding in the rat: eicosapentaenoic acid *v.* docosahexaenoic acid **55,** 107A, 1996
The use of *n*-3 polyunsaturated fatty acid-enriched foods in a dietary intervention study of middle-aged men **55,** 80A, 1996

Portal vein
Portal appearance of glucose and amino acids in the pig after feeding maize starch and native pea starch **55,** 60A, 1996

Postprandial metabolism
Modulating influence of alcohol and aspirin on postprandial lipaemia and factor VIIc in male subjects **55,** 226A, 1996
Postprandial exogenous lipid oxidation in obese and normal-weight women **55,** 225A, 1996

Postprandial state
Disposition of lipids in the postprandial state **55,** 79, 1996

Pregnancy
Does iron consumption protect against anaemia in pregnancy? **55,** 142A, 1996
Identifying the possible causes of maternal obesity **55,** 231A, 1996
Long-term effects of restriction of dietary protein during pregnancy and/or lactation on the growth of the organs of the gastrointestinal tract **55,** 174A, 1996
Programming of the hypothalamic-pituitary-adrenal (HPA) axis by the maternal diet in the rat **55,** 221A, 1996
The requirement for protein during pregnancy **55,** 210A, 1996
Urea kinetics in healthy pregnant women eating habitual and 60 g protein diets **55,** 67A, 1996

Prematurity
Superoxide dismutase activity in sixty nine premature babies from birth over the first week of life **55,** 91A, 1996

Preruminants
Lipoprotein lipase activity and gene expression in heart and skeletal muscles in the preruminant calf **55,** 18A, 1996

Propionate
Concentrations of serum cortisol, insulin and glucagon in young calves before and after receiving propionate orally **55,** 98A, 1996

Protein digestion
Modulated role of proteolytic enzymes in the digestion of food proteins **55,** 56A, 1996

Protein intake
Altered insulin response to a glucose load in rats following exposure to a low-protein diet *in utero* **55,** 44A, 1996
Animal or vegetable protein intakes (100, 200 or 300 g casein or soyabean proteins/kg) differentially alter plasma distribution of cholesterol and triacylglycerols in rats **55,** 105A, 1996
Effect of a maternal diet low in protein on glucocorticoid-sensitive brain enzyme activities **55,** 45A, 1996
Effect of animal or vegetable protein intakes (100, 200 or 300 g casein or soyabean proteins/kg) on VLDL, HDL and apolipoproteins in the rat **55,** 106A, 1996
Effect of methionine addition to a high-protein diet on growth and energy utilization in the rat **55,** 46A, 1996
Long-term effects of restriction of dietary protein during pregnancy and/or lactation on the growth of the organs of the gastrointestinal tract **55,** 174A, 1996
Nitrogen or protein intake and urinary 5-oxoproline excretion in adults **55,** 68A, 1996
The stability of mRNA encoding some pancreatic hydrolases is modulated by dietary protein intake in the rat **55,** 35A, 1996

Protein requirement
The requirement for protein during pregnancy **55,** 210A, 1996

Protein synthesis
Comparison of constant infusion and flooding

methods for measuring muscle protein synthesis: effect of conventional total parenteral nutrition **55,** 151A, 1996
The effect of inhibiting gluconeogenesis on protein synthesis in cachectic tumour-bearing rats **55,** 155A, 1996

Protein utilization
Factors influencing postprandial protein utilization in adults and the elderly **55,** 69A, 1996
The influence of palm oil and palm-oil fractions on protein utilization in the rat **55,** 165A, 1996

Radio-opaque markers
Are radio-opaque pellets suitable markers for upper intestinal transit studies in human volunteers? **55,** 250A, 1996

Republic of Ireland
Food and nutrition policy in the Republic of Ireland: where to from here? **55,** 641, 1996
Nutrition surveillance in Ireland **55,** 689, 1996

Research priorities
Nutrition policy: priorities for new research **55,** 661, 1996

Riboflavin
The effects of riboflavin depletion and repletion on the structure and cytokinetics of the small intestine **55,** 96A, 1996

Rumen
Peptide breakdown by rumen microorganisms is sensitive to inhibition by 1,10-phenanthroline **55,** 237A, 1996

Ruminants
Facilitative glucose transporters in ruminants **55,** 221, 1996

Saliva
A comparison of saliva and plasma ascorbic acid **55,** 87A, 1996

Scotland
Daily and seasonal variation in phylloquinone (vitamin K_1) intake in Scotland **55,** 244A, 1996
Factors influencing final consumption of fruit and vegetables in Scotland: some preliminary results **55,** 119A, 1996
Preferences for approaches to 'healthy eating' education among South Asian family members in Scotland **55,** 243A, 1996

Selenium
Control of selenoprotein synthesis during selenium repletion of selenium-deficient rats **55,** 31A, 1996
Selenium content of UK available infant formulas and estimation of the intake of bottle-fed infants **55,** 222A, 1996
Thyroid selenoenzyme activity and mRNA abundance in second generation selenium and iodine deficient rats **55,** 32A, 1996

Sepsis
Sepsis-induced long-lasting stimulation of liver protein synthesis **55,** 40A, 1996
The effect of ascorbic loading on ascorbyl radical formation in patients with sepsis and healthy subjects **55,** 89A, 1996

Serum
Concentrations of serum cortisol, insulin and glucagon in young calves before and after receiving propionate orally **55,** 98A, 1996
Postprandial serum promoted cholesterol efflux depends on fatty acid composition of the oral load **55,** 71A, 1996
The effect of varying *n*-6:*n*-3 fatty acid ratio of the diet upon blood lipid concentrations in the rat **55,** 166A, 1996

Sir David Cuthbertson Medal Lecture
Immunomodulatory and anti-inflammatory effects of *n*-3 polyunsaturated fatty acids **55,** 737, 1996

Small intestine
Cellular and molecular aspects of fat metabolism in the small intestine **55,** 19, 1996

Smoking
Erythrocyte lipid peroxidation in smokers compared with non-smokers: dose response of vitamin E supplementation **55,** 92A, 1996
Plasma concentrations of carotenoids and antioxidant vitamins in smokers and non-smokers **55,** 93A, 1996

Southern blotting
Southern blotting **55,** 591, 1996

Soyabean
Cellular and humoral immune responses in soyabean protein fed preruminant calves **55,** 97A, 1996

Splanchnic metabolism
Inter-animal variability in the energy expenditure of splanchnic tissues in preruminant calves **55,** 61A, 1996

Stable isotopes
Measurement of stable isotope [^{13}C]ascorbate using gas chromatography with mass spectrometry (GCMS) **55,** 88A, 1996

Starch
Comparisons of metabolic responses to digestible and partly indigestible starches in healthy humans **55,** 7A, 1996
Digestion of maize starch and native pea starch in the small intestine of pigs **55,** 59A, 1996
Is the ileostomist a good model for studies of starch digestion in man? **55,** 50A, 1996
Portal appearance of glucose and amino acids in the pig after feeding maize starch and native pea starch **55,** 60A, 1996

Stomach
Control of gastric secretion **55,** 251, 1996

Stratford Executive Group
Nutrition in the undergraduate medical curriculum **55,** 775, 1996

Stroke patients
Nutritional problems following stroke: assessment and clinical implications **55,** 192A, 1996

Substrate oxidation
Defects in substrate oxidation involved in the predisposition to obesity **55,** 817, 1996
Substrate utilization
The effects of ambient temperature on substrate utilization during prolonged moderate intensity exercise in man **55,** 131A, 1996
Sucrose
Response to weight-reducing diets including and excluding sucrose as a sweetener **55,** 125A, 1996
The effect of sucrose- and aspartame-sweetened drinks on energy intake, hunger and food choice of female, slightly restrained eaters **55,** 124A, 1996
Sugars
A preliminary comparison of the frequency of sugar intake by 8–14 year old children in Tristan da Cunha and a region of Scotland **55,** 242A, 1996
Effect of reduced-fat and reduced-sugar food use on diet and weight status of free-living consumers **55,** 215A, 1996
Low sugar intakes are associated with high body mass index in the Dietary and Nutritional Survey of British Adults **55,** 123A, 1996
Superoxide dismutase
Superoxide dismutase activity in sixty nine premature babies from birth over the first week of life **55,** 91A, 1996
Sympathetic nervous system
The role of altered sympathetic nervous system activity in the pathogenesis of obesity **55,** 793, 1996

Taurine
Taurine metabolism in cats fed on commercial canned or dry foods **55,** 65A, 1996
The Netherlands
Nutrition assessment and dietary guidelines: experience from the Dutch Nutrition Surveillance System **55,** 705, 1996
Thrombosis
A prospective evaluation of central venous blood flow using Doppler ultrasound in patients with long-term central venous catheters **55,** 208A, 1996
Thyroid
Control of selenoprotein synthesis during selenium repletion of selenium-deficient rats **55,** 31A, 1996
Effects of some alterations in diets for weaned piglets on serum thyroid hormone and IGF-I concentrations **55,** 99A, 1996
Thyroid selenoenzyme activity and mRNA abundance in second generation selenium and iodine deficient rats **55,** 32A, 1996
Thyroid hormones
The influence of triidothyronine and/or noradrenaline on perirenal adipose tissue composition in lambs delivered near to term by Caesarean section **55,** 118A, 1996
Tissue differentiation
Zinc deficiency inhibits the differentiation of F9 embryonal carcinoma cells **55,** 30A, 1996
***Trans* fatty acids**
Nutrient sources of *trans* fatty acids in the Scottish population (1984–1986) **55,** 212A, 1996
Transfection
A method of transfecting C_2C_{12} myoblasts at all stages of differentiation **55,** 34A, 1996
Transgenic animals
Transgenic animals **55,** 613, 1996
Tumour necrosis factor
Impairment of interleukin-2 production and increased spontaneous tumour necrosis factor production by peripheral blood mononuclear cells may facilitate an exaggerated response to circulating endotoxins in humans **55,** 157A, 1996
Lymphocyte function may influence the inflammatory and metabolic response to tumour necrosis factor and endotoxins in humans **55,** 156A, 1996

Undergraduate medical curriculum
Nutrition in the medical undergraduate curriculum **55,** 139A, 1996
Nutrition in the undergraduate medical curriculum **55,** 775, 1996
Urea
Estimation of the enrichment of urea N precursors **55,** 42A, 1996
Metabolism of lactose-ureide labelled with ^{15}N and ^{13}C in humans **55,** 38A, 1996
The influence of glycine on urea-nitrogen salvage **55,** 219A, 1996
The influence of sulphur amino acids on urea-nitrogen salvage **55,** 43A, 1996
Transfer of ^{15}N from urea to the circulating lysine pool in the human infant **55,** 37A, 1996
Urea kinetics in healthy pregnant women eating habitual and 60 g protein diets **55,** 67A, 1996

Vegans
Sources of iodine in the vegan diet **55,** 13A, 1996
Vitamin C
Are high fetal vitamin C concentrations due to placental synthesis? **55,** 90A, 1996
Vitamin E
Erythrocyte lipid peroxidation in smokers compared with non-smokers: dose response of vitamin E supplementation **55,** 92A, 1996
Vitamin K
Daily and seasonal variation in phylloquinone (vitamin K_1) intake in Scotland **55,** 244A, 1996
Volatile fatty acids
Volatile fatty acid absorption and water flux in the rumen of sheep in relation to the volatile fatty acid supply **55,** 62A, 1996

Voluntary intake
Does the histamine receptor antagonist, cyproheptadine increase voluntary food intake? **55,** 252A, 1996

von Willebrand's factor
Influence of variation in dietary fatty acid composition on von Willebrand's factor concentration in healthy men **55,** 164A, 1996

Water
Volatile fatty acid absorption and water flux in the rumen of sheep in relation to the volatile fatty acid supply **55,** 62A, 1996

Weaning
Post-weaning dietary manipulation reduces blood pressure in rats with hypertension of fetal origin **55,** 103A, 1996
The effect of feeding and weaning practice on growth and nutritional status of Glasgow boys and girls in the first year of life **55,** 247A, 1996
The effect of weaning practice on fermentation capacity in breast-fed babies **55,** 48A, 1996

Weight loss
Non-diet and diet programmes for overweight: effects on mood, lifestyle and health **55,** 214A, 1996
Response to weight-reducing diets including and excluding sucrose as a sweetener **55,** 125A, 1996
Weight loss and factor VIIc activity in overweight subjects **55,** 137A, 1996

Zinc
Dietary zinc prevents intestinal dysfunction in malnourished milk-sensitized guinea-pigs **55,** 51A, 1996
Zinc deficiency inhibits the differentiation of F9 embryonal carcinoma cells **55,** 30A, 1996
